OBJECTIVE

Computer Science and Engineering graduate with an ongoing M.Tech, offering proven experience in full-stack development, deep learning, and graph-based modelling. Skilled at designing interpretable and production-ready AI systems. Seeking a software engineering or machine learning role to apply technical expertise and contribute to impactful products.

EDUCATION

M.Tech — Computer Science and Engineering <i>Mar Athanasius College of Engineering (Autonomous), Kothamangalam</i>	Ongoing CGPA: 7.75
B.Tech — Computer Science and Engineering <i>APJ Abdul Kalam Technological University (APJAKTU)</i>	2025 CGPA: 7.57
Class XII — Kerala Board of Higher Secondary Examination	2021 Score: 84%
Class X — Kerala Board of Public Examination	2019 Score: 98%

TECHNICAL SKILLS

Languages: C, Python

Web Development: MERN Stack (MongoDB, Express.js, React.js, Node.js)

AI / ML: Deep Learning, Graph Neural Networks, Semi-Supervised Learning, Attention Mechanisms

Tools: TensorFlow, PyTorch, Git

PROJECTS

TrafficXplain — Interpretable Traffic Prediction	Graph Neural Networks Explainable AI
- Built a GNN-based traffic prediction system capturing spatial road-network patterns and temporal trends. - Introduced spatial & temporal masks so the model highlights which roads and time periods drive each prediction. - Applied dual spatial mask fusion to preserve accuracy while making model reasoning fully transparent.	

Semi-Supervised Medical Image Detection	Deep Learning Computer Vision
- Developed a medical image detection pipeline optimised for scenarios with limited labelled training data. - Combined ensemble methods with pseudo-labelling to iteratively improve accuracy on unlabelled samples.	

Product Search Using Ant Colony Optimization	Optimization Bio-Inspired Computing
- Designed a bio-inspired search system applying ACO logic to route users to the most relevant products faster. - Improved search accuracy and reduced retrieval time significantly versus standard keyword-based approaches.	

Coursera Course Recommendation & Resume Automation	Recommendation Systems Full-Stack
- Built a recommendation engine suggesting relevant Coursera courses based on student interests and study area. - Automated resume generation by collecting user inputs and producing clean, formatted output documents.	

CERTIFICATIONS

Introduction to Drones — Drone Assembling & Flight Simulation	2021
Cyber Security and Ethical Hacking — Techmaghi	2023
Blender Bootcamp	2023
NPTEL Cloud Computing Certification	2024

ADDITIONAL INFORMATION

Languages: Malayalam (R/W/S), English (R/W/S), Arabic (R/W), Hindi (R/W)

Memberships: Computer Society of India (CSI)
